# Voting Machine Breakdown

Number of breakdowns by Ward, ordered highest to lowest.

```
length(unique(techlog[["WARD_DIV"]]))
```
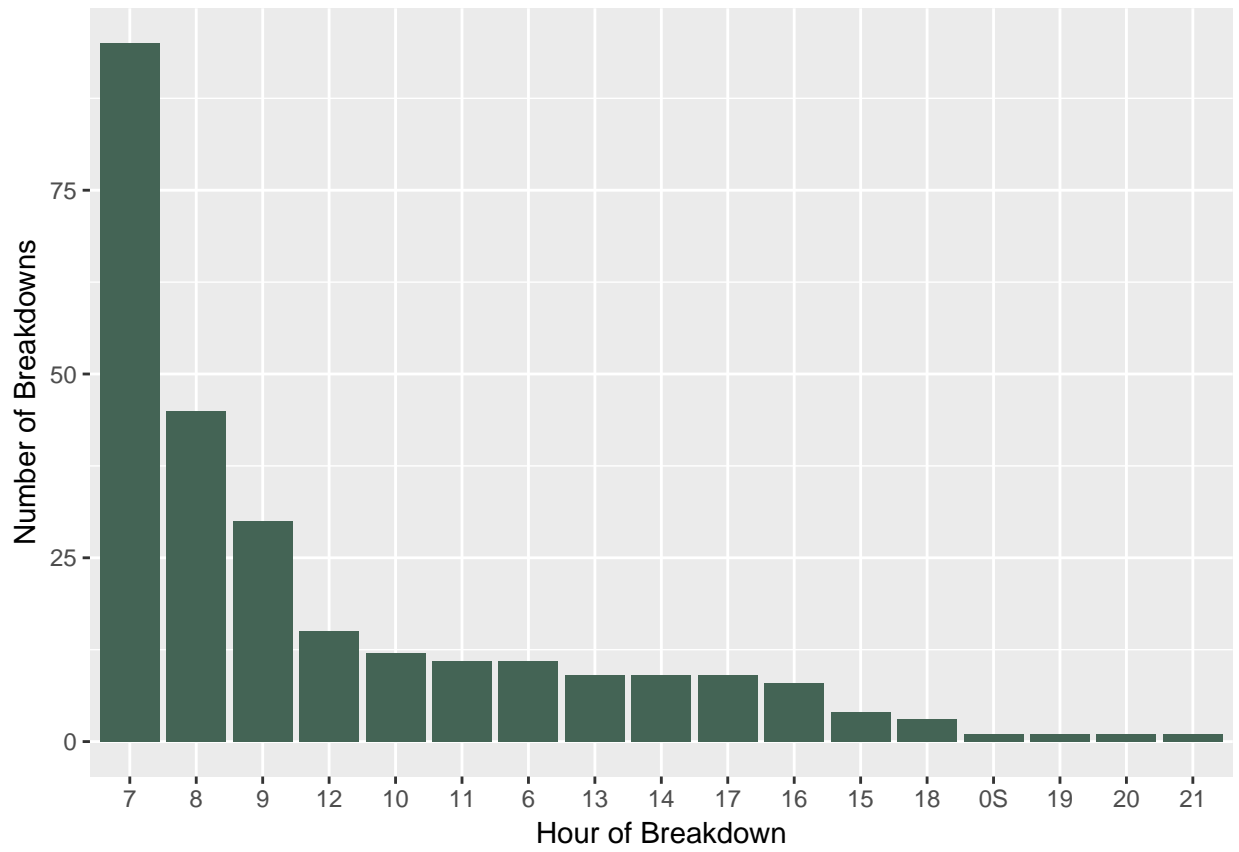

```
## [1] 192
```

192 Divisions (out of 1686) were ultimately affected, going by the repair log

Most of the outages with an explicit scope affected more than one voter (going by volunteer log).

Not all breakdowns have a listed scope, though guesses could be made by checking notes, etc.

Most breakdowns occurred very early in the day, in the first few hours of voting.

Error Code 70 and Power Failure were the cause of the most breakdowns by far.
